

Shrink by Transcoding

Objective:

A 20-minute video recorded at 640 x 480 30 fps TV-SHQ can be transcoded (video converted) to a less than 50-MB MP4 file.

Computer System:

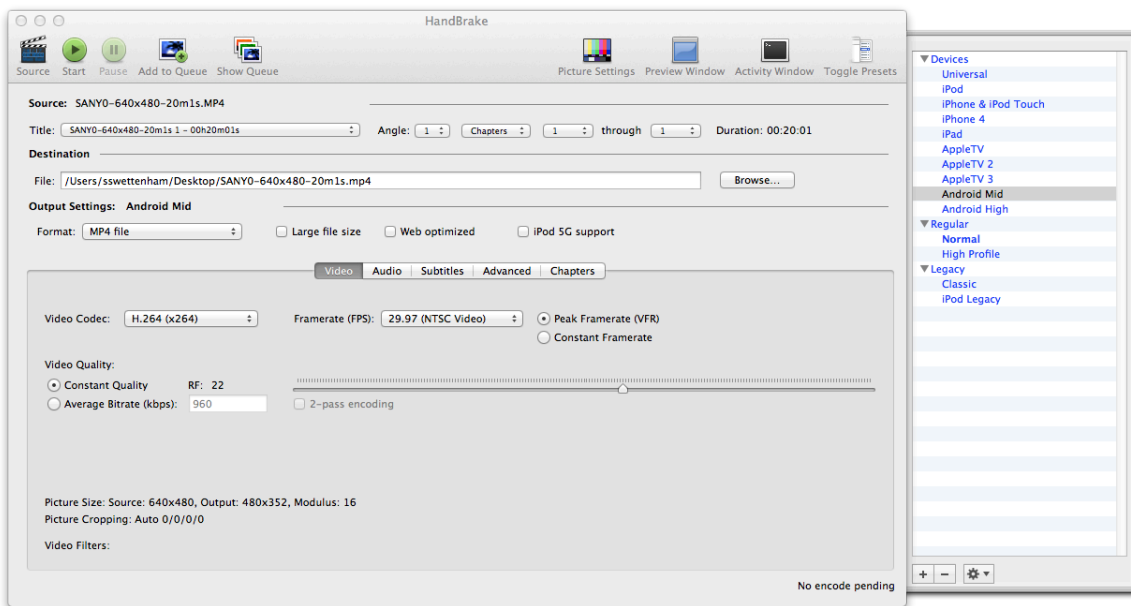

Desktop/laptop running MAC, Windows, or Linux.

Application:

Any transcoder with mobile presets, for example Handbrake (<http://handbrake.fr>)

Method:

1. Download and install Handbrake (<http://handbrake.fr/downloads.php> or <http://sourceforge.net/projects/handbrake>)
2. Open Handbrake and select Source.

3. Select Toggle Presets and select Android Mid.
4. Select Start (output will be in the Destination file path).
5. Review output.
